

# elta Elta Peristomal Paste

## Peristomal Paste

### Available In Two Formulations:

- Alcohol
- Alcohol Free

Elta<sup>®</sup> Peristomal Paste successfully fills in scar lines and skin crevices in order to allow the safe, secure fitting of an ostomy pouch.

### Availability:

- Standard : 60g tubes

Other sizes are available on request

## Indications:

Elta<sup>®</sup> Peristomal Paste is an effective paste to be used for:

- Fistulas,
- Urostomies,
- Colostomies
- Ileostomies.

It is used to fill any irregularities on the skin surface that affect the ability to securely attach an ostomy appliance.

## Product Features:

- Available in alcohol formulation and alcohol free formulation.
- Uneven skin around the site of the stoma results in an imperfect seal at the stoma site. Elta<sup>®</sup> Peristomal Paste creates a flat surface for the stoma appliance to create a perfect seal with the skin.
- This function deters any leakages from occurring and causing skin irritation.

## Alcohol Formulation:

- Firm setting, plugs crevices and creates a secure fitting of stoma appliance.
- Dries on application – non messy and easy to use.
- Improves pouch fit and increases wear time of appliance.
- Prevents leakages from appliance resulting in irritated skin.

## Alcohol Free Formulation:

- No Sting on Application.
- Re-Mouldable.
- Easy Squeeze Tube.
- Suits Most Skin Types.
- Prevents leakages from appliance resulting in irritated skin.
